## APC101: Introduction to the Apcera Platform

Course Duration: 1 Day

### Delivery Methods:

- Instructor-led Classroom
- Instructor-led Online (virtual)
- Private On-site

## Summary

This course introduces you to the Apcera Platform for trusted innovation. After completing this course you will have a foundational understanding of the Apcera Platform, including its use, editions, architecture, and governance capabilities. This course prepares you for additional courses in the Apcera learning pathway.

## Learning Objectives

After completing this course, you will be able to:

- Articulate the vision of the Apcera Platform for trusted innovation
- Deploy, orchestrate, and govern a web application using the Apcera Platform
- Discuss Apcera Platform in relation to today's IT landscape
- Understand the technology, including containers, workloads, and connectivity
- Discuss how Apcera makes Docker fit for production
- Diagram the platform architecture, including component roles and planes
- Describe policy features for governance and trust across clouds

## Audience

- Developers
- DevOps
- Architects
- Managers

## Prerequisites

- None
